

Title: Senior .NET Developer

Summary: Hamacher Resource Group (HRG) is currently seeking to hire an experienced .Net Developer to become an integral part of their development team in Waukesha, WI. This person will be responsible for developing, testing, improving and maintaining in-house, custom software used to support our retail services business.

We're looking for someone with a strong technical background (especially with databases / back-end development) and good breadth of knowledge. This person should be collaborative, service-oriented, and willing to help out wherever needed. Communication and organizational skills are keys for this position, along with a problem-solution attitude.

Responsibilities:

- Act as a full-stack developer (front, middle, and back-end development) on the software development team, working on new and existing applications.
- Design and develop stable, reliable, user-friendly applications using primarily Microsoft Technologies (.NET, C#, SQL Server, Azure).
- Work with the technical business analyst, clients, and end-users to gather user requirements and identify needed features.
- Create data models to support new projects as well as to improve existing data systems; modify databases according to requests.
- Plan and support data migration projects from legacy systems.
- Test code for defects, ensure security, functionality, and to troubleshoot malfunctions.
- Make recommendations to improve applications and establish best practices; research and suggest new products, services and protocols.
- Support the development of technical and training manuals; document methods and techniques to solve problems to operate efficiently and consistently.
- Provide data management support to users.
- Work with our network and database administrators to ensure SQL Servers are optimized and configured properly.

Qualifications:

- 5+ years' experience as a software developer (full Microsoft tech stack - .Net, C#, SQL Server; JavaScript, HTML).
- BA/BS in computer science, engineering or relevant field desired.
- Strong back-end / database development skills required (relational databases such as SQL Server including complex query creation and execution, Microsoft Access).
- Strong data modeling skills; experience utilizing SSIS, SSRS, SSAS.
- Knowledge of database development on Azure, or other cloud based systems desired
- Working knowledge of Microsoft BI, Tableau, or other data visualization tools.
- In-depth understanding of data management (e.g. permissions, recover, security and monitoring).
- Strong analytical and critical thinking skills; excellent communication, time management and organizational skills; problem-solving attitude.
- Ability and desire to work directly with end-users to learn about their needs; strong business and technical acumen to interpret client requests.

About Hamacher: Hamacher Resource Group focuses on improving results across the retail supply chain for product manufacturers, distributors, retailers, technology partners, and other organizations by addressing dynamic needs such as assortment planning and placement, retail execution strategy, fixture coordination, item database management, brand marketing, and analytics.
